| | | | | | | | | |
| | | | | | | | | 9 |
| | Management is a set of processes that can keep a complicated system of people | | | | | | | |

Management is a set of processes that can keep a complicated system of people and technology running smoothly. The most central characteristics of management include scheduling, accounting, organizing, staffing, controlling, and problemsolving. Leadership is a set of process that generates organisations in the first place or acclimatizes them to expressively changing situations. Leadership outlines what the impending should look like, bring into line people with that vision, and inspires them to make it happen despite the obstacles. This distinction is absolutely crucial for our purposes here: Successful transformation is 70 to 90 per cent leadership and only 10 to 30 per cent management. Yet for historic motives, numerous organisations today don't have much headship. And almost everyone thinks about the problems here as one of managing change. For most of this century, as we created thousands and thousands of large organizations for the first time in human history, we didn't have enough good managers to keep all those bureaucracies functioning. Thus many companies and academies developed management programmes, and hundreds and thousands of people were stimulated to learn managing on the job. And they did. But, people were taught little about leadership. To some degree, management was emphasized because it's easier to teach than leadership. But even more so, supervision was the chief item on the twentieth-century outline because that's what

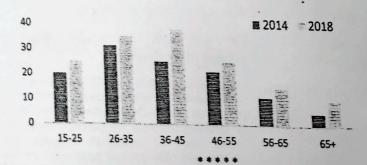

was needed. For every entrepreneur or business builder who was a leader, we needed hundreds of managers to run their ever growing enterprises. Regrettably, for us today, this importance on management has often been longstanding in corporate cultures that dishearten workers from learning how to lead. Ironically, past success is usually the key ingredient in producing this outcome. The condition, as I have perceived it on many cases, goes like this: victory creates some degree of market supremacy, which in turn produces much progress. After a while keeping the ever larger organizations under control becomes the primary challenge. So attention turns inward, and managerial competencies are nurtured. With a robust importance on supervision but not on headship, administration and an inward focus take over. But with continued success, the result mostly of market dominance, the problem often goes unaddressed and an unhealthy arrogance begins to evolve. All of these features then make any renovation struggle much more problematic. Arrogant managers can over evaluate their current performance and competitive position, listen poorly, and learn slowly. Inwardly focused employees can have difficulty seeing the very forces that present threats and opportunities. Bureaucratic cultures can smother those who want to respond to shifting conditions. And the lack of leadership leaves no fore inside these organizations to break out of the morass.

- (1) Why, according to the author, is a distinction between management and leadership crucial?
- (a) Leaders are reactive whereas managers are proactive.
- (b) Organisations are facing problems of not getting good managers.
- (c) Organisations are pursuing the strategy of status quo.
- (d) In today's context, organizations need leaders much more than managers in transforming them.
- 2. Why did companies and universities develop programmes to prepare managers in such a large number?
- (a) Companies and universities sought to produce funds through these programmes.
- (b) A large number of organizations were created and they needed managers in good number.
- (c) Organisations did not want spend their scarce resources in training managers.
- (d) Organisations wanted to create communication network through managers.
- 3. Which of the following statements is NOT TRUE in the context of the passage?
- (a) Bureaucratic culture can smother those who want to respond to changing conditions.
- (b) Leadership produces change and has the potential to establish direction.
- (c) Pressure on managers comes mostly from within.
- (d) Leadership centres on carrying out important functions such as planning and problem-solving.
- 4. Which of the following is not the characteristic of bureaucratic culture?
- (a) Managers listen poorly and learn slowly.
- (b) Managerial competencies are nurtured.
- (c) Employees clearly see the forces that present threats and opportunities.
- (d) Prevalence of unhealthy arrogance.
- 5. Which of the following is SIMILAR in meaning to the word SMOTHER as used in the passage?
 - (a) suppress
 - (b) encourage
 - (c) instigate
 - (d) criticise
- 6. Why were people taught little about leadership in management programmes?
 - (a) Teachers were busy in understanding the phenomenon of leadership.
 - (b) Enough study material was not available to facilitate teaching of leadership.
 - (c) Focus of these programmes was on developing managers.
 - (d) Leadership was considered only a political phenomenon.
- 7. In the passage, management is equated with
 - (a) Organisation
 - (b) Leadership
 - (c) Organisational vision
 - (d) Bureaucracy

8. Why does the attention of large organizations turn inward? (a) Their managers become arrogant. (b) They have to keep themselves under control. (c) Their success creates market dominance. (d) None of these 22. a. Write a set of eight instructions to be followed to maintain a laptop in good working 2 condition. 8 3 (OR) 2 b. Read the following passage and draw the flow chart: Eco-bags can naturally decompose over time. However, it is more profitable and ecofriendly to recycle them for future use. Eco-bags are recycled in special cleaning and processing facilities through an innovative and highly cost-effective process. Collecting and sorting out used bags is the first step of the recycling process. Recyclables can be collected from drop-off centres or curb side bins and then sorted according to the material they are made of: paper, jute, cotton, or recyclable plastic. Once sorted, they are sent to different units for further processing. There, these materials are cleaned and churned for the manufacture of customisable shopping bag material. Bag material produced after initial processing becomes the raw material. During this stage, the material is treated with specific chemicals to make a new, freshly manufactured fabric. The end product is a foldable bulk, all set for the next stage of the recycling process. At this stage, the bag needs a little flair and colour. Plain new fabric produced in bulk is now dyed or printed according to product orders or market trends. During the last stage of the process, bags are aesthetically or functionally enhanced. Designers then add special features — for example, wooden handles, inner or outer lining, zips, buckles, or pockets. These addons will make the final product more attractive to buyers. And they also create a greater diversity in bag styles, fashion, and design. Write an essay of about 200 words on any one of the topic given below: 8 3 23. a. Role of Online Communication in Post-truth world. 9 8 9 b. Cyber bullying in Social Media and its impacts. 3 24. a. Imagine yourself to be the Team Leader in Wipro and send a mail to your team 10 appreciating the successful completion of the Project. b. Compare and contrast extensive and intensive reading with examples. 10 25. a. Elaborate on the types of reports and its significance in an organization. 5 10 b. Write a letter to the Manager of Shubiksha Electronics, Chromepet, Chennai, 5 5 10 complaining that the mobile you recently bought from them does not function properly and ask for a replacement. $PART - C (1 \times 15 = 15 Marks)$ CO PO Answer ANY ONE Questions 26.
